Introduction

Newport Group, a national compensation, retirement, and benefits consulting firm, was engaged by the United Counties Council of Illinois (UCCI) to be the third party administrator for this year's Statewide Salary & Fringe Benefits Survey. We are pleased to present the findings of the 2018 UCCI Statewide Salary & Fringe Benefits Survey. The survey was conducted via a web-based survey platform that launched in November, 2017. The effective date of data is January 1, 2018.

The data contained in this report are based on responses from 63 Illinois counties, this is nearly a 15% increase in participation from the 2017 survey. A profile and detailed list of survey participants can be found on the following pages.

This survey is designed to assist county officials in the preparation of annual budgets, negotiation of labor contracts and similar personnel related tasks. United Counties Council of Illinois conducts an annual survey of elected officials and public employee salaries and fringe benefits that outline details of 78 different positions. This survey addresses fringe benefits received by specific employee groups and salary schedules of identified positions within the counties.

The survey is divided up into three sections: Section 1 is County Statistics which includes information on population and the budget; Section 2 is the Salary Schedule of elected officials and county employees; Section 3 is Fringe Benefits.

Demographics

Survey Definitions

County Count: Total number of counties reporting a match to the survey position.

Minimum: The smallest value or observation of a sample.

25th Percentile: Equals or exceeds the highest rate among the lowest 25% of all rates within a sample.

Median: Statistical point at which half of the incumbents' salaries reported are above and half are below.

Average: Simple average of the incumbents' salaries.

75th Percentile: Equals or exceeds the highest rate among the lowest 75% of all rates within a sample.

Maximum: The largest value or observation of a sample.

Statistical Conversions

For statistical analysis, a conversion of salaries was completed in both annualized and hourly formats using the number of hours worked per week completed by participants. If the information was left blank, a 40 hour work week was assumed.
