•STATE BOARD OF EDUCATION

The FY 21 budget encompasses \$13.2 billion for the Illinois State Board of Education (ISBE). This constitutes an increase of \$10.5 million in General Revenue Funds (GRF) over the FY 20 appropriations.

FY 21 ISBE operational lines are funded at FY 20 levels, at \$23.3 million in (GRF).

Evidence Based Funding (EBF) - \$7.2 billion

PA 100-465 replaced the General State Aid (GSA) school funding formula with Evidence-Based Funding (EBF). As a result, bilingual education and several mandated categorical appropriations were consolidated into the school funding formula for the first time in FY 18. The EBF formula includes a base funding minimum to ensure that each district receives no less than it did the previous year. Additional funding above the base funding minimum is distributed using a tier-based system prioritizing school districts that are farthest from adequacy. PA 100-465 also established a minimum funding level of \$350 million in new EBF each year. If this level is not appropriated, any new funding will be distributed in a manner that even further prioritizes low-wealth school districts.

The FY 21 holds all school districts harmless to FY 20 distributions levels, no new tier money was appropriated to the FY 21 budget.

Early Childhood Education Block Grant -- \$543.7 million

The Early Childhood Block Grant (ECBG) funds the Preschool for All (PFA), Preschool for All Expansion (PFAE), and Prevention Initiative (PI) programs. These programs enable Illinois

students to receive the benefits of kindergarten readiness and high-quality comprehensive services, they also help families to prepare children for later success.

Preschool for All

The Preschool for All program provides half-day or full-day educational services to 3- to 5-year old children who are not age-eligible for kindergarten. The program focuses on providing high quality educational programs for children who have been determined to be at risk.

Preschool for All Expansion

The goal of the Preschool for All Expansion program is to provide high-quality preschool programs that reach and serve 3- to 5-year-old children in high-need communities and include a full school day of instruction and comprehensive services in the areas of medical, dental, and mental health. The PFAE program provides additional quality components that include an instructional leader, a parent educator, community partnerships, and family education opportunities.

Prevention Initiative

Prevention Initiative provides voluntary, continuous, intensive, research-based, and comprehensive child development and family support services for expectant parents and families with children from birth to age 3. The program offers coordinated services through a network of child and family service providers and promotes the development of at-risk infants and toddlers up to age 3. PI is offered at both home and center-based facilities, allowing children to be taught in safe and healthy environments rooted in their local community.

Competitive grants will continue to be awarded through a Request for Proposals process, as in previous years. Eligible applicants for the ECBG programs include Regional Offices of Education, public school districts, university laboratory schools approved by the Illinois State Board of Education, charter schools, area vocational centers, and public or private not-for-profit or for-profit entities with experience in providing educational, health, social, and/or child development services to young children and their families.

The FY 21 budget holds Early Childhood Education funding flat at FY 20 levels for a total of \$543.7 million.

Additionally, the FY 21 budget includes funding for the federal Preschool Development Birth through Five Grant for \$15,000,000 million.

Career and Technical Education -- \$43 million

Career and Technical Education (CTE) programs in Illinois strengthen students' technical skills, facilitate transitions to postsecondary training programs, employment, or both, and help students meet the Illinois Learning Standards. CTE programs also close achievement and equity gaps by increasing access for students across the state.

CTE increases students' opportunities for careers in high-wage, high-skill, and in-demand occupations. Secondary CTE instructional programs are grouped into five broad areas based on career clusters and provide students with 16 career pathways. The five cluster areas are Agriculture Education; Business, Marketing and Computer Education; Family and Consumer Sciences; Health Science Technology; and Technology and Engineering Education.

The FY 21 budget holds CTE funding flat at FY 20 levels for a total of \$43 million.

Mandated Categorical Reimbursements (MCATs)

These line items aim to ensure that these students receive a more equitable education according to their needs. Certain increases and reductions are reflected by ISBE's recommended FY 21 budget request.
